**suitable extinguishing media:** Water, foam, powder, carbon dioxide (CO<sub>2</sub>).

**5.2 Special hazards caused by the material itself, the products of combustion or resulting gases:**

In case of fire carbon monoxide, carbon dioxide and gaseous decomposition products arise.  
 If perfluorinated polyether containing material is affected, temperatures of above 290 °C lead to form toxic fumes containing fluorine compounds including C<sub>3</sub>F<sub>6</sub>, CF, COF, COF<sub>2</sub>. The latter two compounds hydrolyze in the presence of water to form HF, CF<sub>3</sub>COOH and HF, CO<sub>2</sub> respectively.

**5.3 Notes for fire fighting**

**Special protective arrangements:** Usual fire fighting protecting measures.

Keep personnel removed and upwind of fire. Wear self-contained breathing apparatus.

Wear full protective equipment.

**Further informations:** In case of heating the material to temperatures of appr. 235 °C the material starts melting and becomes viscous.

Do not breath in combustion gases.

**Section 6: Measures in case of unintentional releasing**

**6.1 Measures of personal precaution:** not appl.

**6.2 Measures for environmental protection:** not appl.

**6.3 Process for cleaning:** Take up mechanically and dispose in compliance with the federal, state and local regulations or give to a recycling plant.

**6.4 References to other sections:**

No hazardous compounds are released.  
 Informations for safe handling are given in section 7.  
 Informations for personal protective equipment are given in section 8.  
 Disposal informations, see section 13.

**Section 7. Handling and storing**

**Indications for safe handling:** No special indications necessary.
